

# **SYSTEM FOR CONFIGURATION OF DYNAMIC COMPUTING ENVIRONMENTS USING A VISUAL INTERFACE**

## **ABSTRACT OF THE DISCLOSURE**

5           The present invention discloses a user interface for creating a dynamic  
computing environment using allocateable resources. The interface enables the fast, efficient  
selection and configuration of resources for the computing environment. The resources are  
fully selectable and allocable by a system architect. In a first embodiment, the ability is  
provided that allows a customer or system architect to design a system by allocating  
10 resources and specifying how the resources are to be used. The system architect may create a  
computing environment from a remotely accessible user interface such as a web page on the  
Internet. Thus, the system architect can create, modify and operate the environment from  
anywhere in the world.
